

AMENDMENTS TO THE SPECIFICATION:

Page 3, replace the paragraph, beginning on line 12, with the following amended paragraph:

--A frame 50 carrying a screen 52 is mountable on the base by means of channelled slides 54 so that it is slidable downwardly (Figure 7) to increase the vertical dimension of the visor; or to ~~the left~~ one side (Figure 8) to provide additional shade at the central zone of the windscreen. This may also be achieved by providing that the screen is hinged at [[55]] 56.--

Page 3, replace the paragraph, beginning on line 16, with the following amended paragraph:

--The versatility of the visor of the invention is illustrated in Figures 9 and 10. In the former the ~~second-unit~~ frame 50 is dropped as in Figure 7 and the ~~third-unit~~ screen 52 is slided to a central position; while in the latter Figure 10, the ~~third-unit~~ screen 52 is swung to a position adjacent the side window while the ~~second-unit~~ frame 50 remains in its Figure 7 position.--

Page 4, replace the paragraph, beginning on line 1, with the following amended paragraph:

--Tension spring loops 60 ~~(not shown)~~ are provided at the hinges 54 so that the screen is maintained in its desired angular position.--
